

Join our Patient Council

Do you have
experience of living
with Parkinson's ?

Are you interested in
influencing research to
help shape future
Parkinson's care using
digital technology

About TORUS

TORUS is a five-year
research project
developing sensor
technology and artificial
intelligence to monitor and
measure symptoms of
Parkinson's at home.

What is the role?

- The Patient Council will comprise people with Parkinson's or those living alongside someone with Parkinson's.
- It will review research progress and provide advice and guidance.
- It will meet virtually at minimum 3 times a year, with potential face to face meetings on an ad hoc basis.
- Participation lasts up to 5 years, but you can stop whenever you like.
- You will be reimbursed for your time.
